

A healthy metabolism is evidenced by several key biomarkers:

- Minimal amounts of dangerous visceral (belly) fat
- Normal waist circumference
- Healthy body weight
- Normal fasting glucose levels, indicating healthy insulin sensitivity
- Normal cholesterol, triglyceride and blood pressure levels

While the best way to get metabolically fit is through proper diet and exercise, new research indicates Oligonol® — a low-molecular-weight polyphenol derived from the Asian superfruit lychee and featured in Metasol™ — may provide an added advantage.

A published, randomized, double-blind human clinical trial lasting ten weeks found that, compared to placebo, taking 200mg of Oligonol daily:

- Reduced visceral fat volume by 15%*
- Shrank waist circumference by 3 centimeters*
- Caused a significant reduction in body weight*
- Increased sensitivity to insulin*

In 2008, Oligonol received the prestigious Nutracon Award as the “Top Science-Backed Product of the Year.”
